

Funny problems

- 1) Predator / prey relations
- 2) Diet restrictions, inability to digest certain food, certain food being toxic.
- 3) Relations with humans - either one or the other dominating the world
- 4) Species relationships, natural weakness of certain species or inclination to harm
- 5) Racism
- 6) Inability to live in certain climates or habitats
- 7) Cost of living arrangements (climate controlled etc.) - would be an issue for exotic species
- 8) Jobs they can or cannot perform
- 9) Human biases, behavior like one anthropomorphic - funny paradox existing alongside anthropomorphic

- 10) Loose hair, shedding
- 11) Heat, going into season
- 12) Would males need to be castrated to keep populations under control and strong bloodlines?
- 13) Some species are natural loners while others live in a herd - could cause problems in work, relationships, general life...
- 14) Cross-species cannot reproduce. However, making pure male to reproduce would remove the relationship problem, allowing pure bloodlines.

The whole of the
 world is now in a
 state of confusion and
 disorder. The people
 are all in a state of
 confusion and disorder.
 The whole of the world
 is now in a state of
